The first procedure for completing the knight's tour was Warnsdorff's rule, first described in 1823 by H. C. von Warnsdorff. In the 20th century, the Oulipo group of writers used it, among many others. The most notable example is the 10 x 10 knight's tour which sets the order of the chapters in Georges Perec's novel Life a User's Manual.

The kernel is a computer program at the core of a computer's operating system that has complete control over everything in the system. It is the "portion of the operating system code that is always resident in memory", and facilitates interactions between hardware and software components. On most systems, the kernel is one of the first programs loaded on startup (after the bootloader).
