Place one small electrode on the perineum, i.e. the surface area between the anus and the scrotum. One large electrode over the sacrum, i.e. the large, triangular bone at the base of the spine and above the coccyx. The area between the pads is large enough to cover and stimulate all the motor nerves and sympathetic nerve fibres in question.

Have been using TENS for 30+ years, on and off. The Manual provides very little help in settings (in comparison to NeuroTrac unit I replaced), and gives little information on how to use. As Microcurrent pad placement differs from TENS/IF, much research was needed to be able to use effectively. (try practicalpainmanagement website i.e.)
